Federal Steel Supply – The One-Stop Pipe Source For Oil & Gas ... Worldwide

INNOVATIVE SOLUTIONS

To meet a critical delivery schedule for a major refinery project, Federal Steel Supply was able to call on its strong supplier relationships to expedite the manufacture, inspection, fabrication (include finning) and delivery of over 300 tons of special order P9 piping in less than 4 months.

EXTENSIVE INVENTORY

Due to a refinery emergency in the Far East, our customer asked Federal Steel Supply to expedite delivery of material to meet a critical repair schedule. We immediately shipped, via air freight, over 100,000 pounds of X grade pipe to enable the emergency repair.

FLEXIBLE DELIVERY

After a major fire severely damaged a domestic refinery, Federal Steel Supply was tasked with preparing replacement material as quickly as possible. Within hours over a weekend, our Sales and Operations team processed and delivered 120,000 pounds of P5 piping for the emergency repair.

UNPARALLELED SERVICE

To help expedite the repair of a failed steam line, Federal Steel Supply replaced over 2,000 feet of heavy wall Chrome-Moly pipe. To meet our customer’s needs, we found international sources to combine material with our stock and machining capabilities. We were able to deliver the required material within 3 weeks of the original order placement.

Inventories We Offer

Specification	Grade	Description
A53 / SA53	A/B	Standard Specification for Welded & Seamless Pipe - Black or Galvanized, Plain-End or Threaded and Coupled
A106 / SA106	B/C	Seamless Carbon Steel Pipe for High Temperature Service
